## **Proposal Approved for Final Design Services for New Mixed-Use Public Library**

At their regular meeting on August 14, 2023, the New Richmond City Council approved a professional services proposal from consultant ISG for the final engineering and design for a new mixed-use public library.

The scope of services for the contract includes civil engineering, architecture, structural engineering, mechanical engineering (HVAC and plumbing), electrical engineering, technology design, interior design, permitting, and construction administration. Upon completion, the City will have State-approved building plans ready to bid out to general contractors for construction.

“This is another important step forward for the library building project” said City Administrator, Noah Wiedenfeld. “We look forward to engaging with the community and soliciting feedback to be incorporated into the facility design, and ultimately making final decisions for this important project.”

ISG is a nationally recognized multi-disciplinary design and engineering firm offering architectural, engineering, environmental, and planning capabilities. They have experience designing facilities in a variety of fields, including but not limited to public libraries, community centers, schools, large event venues, children’s museums, and more. The City and partner Three Sixty Real Estate Solutions are working towards a groundbreaking in 2024 with project completion in 2025.
