

## New Richmond Community Library & Residences Construction Update: 2/25/2025

*February has brought many visual changes to the project. The townhome building has a roof and windows, and mechanical, electrical, and plumbing trades are starting rough-in. Framing of the second level of the mixed-use building is nearing completion. Canopies are staking shape with a majority of the structural steel in place for the steel stud framing crew to infill with studs and wall sheathing. Brick veneer work will begin soon.*

*A few work days were lost in February due to snow and some frigid cold temperatures, but the weather forecast the week of February 24-28 looks favorable with temperatures in the 40s.*
